

Responsible Tourist Guide

At **GF Hoteles**, we work to protect the environment, support the local community, and preserve the culture of the destination.

During your stay, you too can contribute by travelling responsibly.

Security and protection

- **Protection of People:** Familiarize yourself with indicators of trafficking or exploitation. If you suspect child abuse or any other form of mistreatment, immediately inform the authorities or hotel staff.
- **Animal Welfare:** If you see abandoned or exploited animals, ask at your accommodation how to contact local organizations.

Luggage and Environmental Care

- **Travel light:** Pack only what you need to reduce your carbon footprint. Avoid carrying unnecessary personal care products.
- **Sun-conscious:** Use biodegradable sunscreens. Avoid chemical ingredients that damage coral, such as: Oxybenzone, Octinoxate, Octocrylene, Benzophenones, and microplastics (nanoplastics).
- **Zero plastic:** Always bring your reusable water bottle and cloth bags. The best waste is the waste that isn't generated.

Mobility

- **Discover the destination in a sustainable way:** Get around by public transport, bicycle, or on foot.

Support Local Businesses

- Buy local products and crafts
- Enjoy the local cuisine
- Participate in responsible activities and excursions

Respect and Culture

- **Learn and Discover:** Research local customs before you arrive. Discover authentic places and activities that connect you with the essence of the destination.
- **Privacy:** Always ask permission before photographing or recording people. Their privacy is a priority.

Smart Consumption

- **Scarce resources:** Take short showers, turn off the tap while brushing your teeth, and use the half-flush toilet button. Water is life.
- **Climate control:** Adjust the air conditioning or heating only when necessary. Always turn them off when opening windows or leaving the room.
- **Waste:** Find out about local recycling regulations. If you have any questions, ask the hotel staff.
- **Food:** Order only what you will eat. Avoiding food waste is respecting the origin of food.

Thank you for **travelling responsibly.**

Together we can protect this destination for future generations.
